## Two new LF 10 with hydraulically lowerable lifting device for the fire department Schwaigern

Giengen, May 2022 – The two departments Massenbach and Stetten of the Schwaigern fire department are happy to receive one new ZIEGLER firefighting vehicle (LF 10) each. In addition to the typical ZIEGLER specific features, the two identical vehicles are also equipped with a hydraulically lowerable lifting device on the roof.

Getting on the vehicle roof to remove loading parts is always associated with a danger - especially during an operation. The upcoming standardization therefore recommends removal aids, some of which are already standard internationally.

The free space required for roof access can now be used for equipment. Since the shutters are also rolled up on the roof, this means optimum use of space. Besides, no additional personnel is needed, and the pre-coupled suction hoses save additional time. The system is controlled via a Z-Control handheld of the latest generation.

The lifting device is equipped with the following loading:

- Extension ladder
- Scaling ladder
- 4 x suction hoses A
- Fireman's hooks
- Chimney sweeper linkage
- Rescue board
- Scaling ladder connection part
- Exhaust hose
- Dimensionally stable 3 m C-hose

Further detailed technical information on the vehicles can be found on page 2.
