### Panoramic sunroof

Thanks to the large panoramic sunroof, the interior of the cab is filled with natural light. This not only creates a unique sense of space, but also helps the crew prepare quickly during operations.

### Step in while standing upright

The headroom highlights the spaciousness of the cabin. Folding seats in the entry area provide ample room to move when getting in and out.

# Z-Cab 4 PA

## Innovation with 4 SCBA seats

A defining feature of the spacious Z-Cab 4 PA is its four forward-facing SCBA seats. Thanks to the large panoramic sunroof, the interior is light-flooded for the crew of 1+5. The crew cab has been designed with a strong focus on ergonomics and the specific requirements of firefighting operations.

The cabin delivers high operational performance and compact dimensions in a vehicle design specifically developed for narrow urban environments, rapid initial responses and a wide range of operational scenarios. Its outstanding handling and spacious interior set it apart, ensuring rapid operational readiness on site.

## Ready before others arrive

### Ready before others arrive

All seats face the direction of travel, allowing group leaders and crew members to communicate effectively. The four SCBA seats allow operators to don their gear safely and

ergonomically while en route, ensuring they arrive at the scene fully prepared. The SCBA can be unlocked with the push of a button – a real time-saver when every second counts.
