Three innovations awarded German Innovation Award 2021 for ZIEGLER

Giengen, 05/18/2021 – ZIEGLER has won this year's German Innovation Award for three of its innovations. The winners were the new Z-Class, the Z-Cab AiR and the latest generation of Z-Control.

This is the second time that the Z-Class and the Z-Cab AiR have received an award. Both products have also won the iF DESIGN AWARD 2021. Z-Control of the latest generation has already been nominated for the UX Design Awards in 2020.

About the award

The German Innovation Awards honor products and solutions across sectors, which differ from previous solutions mainly by being user-centered and offering added value. They do so because there are innovations in all sectors that shape the future and improve life. Sometimes you see them at first glance – but often not. The German Innovation Awards aim to change that. They make great achievements visible to a wide audience and ensure successful positioning in the market.

German Design Council – the organizer

The German Design Council has been operating since 1953 as one of the world's leading centers of expertise in communication and knowledge transfer within design, branding and innovation. It is part of the worldwide design community and has always contributed to the establishment of global exchange and networking thanks to its international offering, promotion of new talent and memberships. With events, conventions, awards, jury meetings and expert committees, the Council connects its members and numerous other international design and branding experts, fosters discourse and provides important stimulation for the global economy. More than 340 businesses currently count among its members.
