

# Z-Vision Lighting solution of the latest generation

## Improved performance through optimized lighting

With Z-Vision Side of the latest generation, ZIEGLER presents an advanced lighting solution. An additional LED strip in the perimeter lighting provides significantly higher light output and improved illumination.

The larger illuminated area on the ground increases safety and efficiency during operation. The development is based on a scientific approach and enables a significant increase in light output: up to 5,000 lumens per Z-Vision element.

## Z-Vision – Comparison of generations
